BACKUP/SOLAR

REMCO products are developed and manufactured with quality in mind. Our batteries use the highest quality A-grade lithium cells, so you can feel confident that we've got your back.

Key advantages of REMCO Lithium

- Light Weight vs traditional batteries
- 3000+ recharge cycles up to 5 times more compared to AGM
- Less maintenance and no sulfation
- 100% Amp hour capacity available
- Faster recharge vs traditional batteries
- Connect up to 48V in series or 4 batteries in parallel

Smart Battery Management

The Smart BMS built in Bluetooth app has been designed to keep you informed, ensuring safe operation and maximum service life.

- On-demand State of Charge % and capacity monitoring
- Amp meter – easy appliance current monitoring
- Charging / discharge Control Switch
- Battery Health Indicators:
 - Individual cell voltage / balance
 - Temperature of the cells
 - Health rating
- Real-time trouble-shooting alerts
- Recharge cycle counter
- Historical data display
- Connectivity distance up to 10m
